

DPL FBR Digital Invoicing – Sandbox Setup Steps

Company: DPL Pvt Ltd

NTN: 2226849-9

This guide provides detailed steps for Furqan Bashir to follow in the **FBR IRIS portal** to get started with sandbox implementation.

STEP 1: Login to FBR IRIS

1. Open the IRIS portal: <https://iris.fbr.gov.pk>
2. Enter **DPL's NTN credentials** (Username & Password)
3. Click **Login**
4. From the top menu, select **Digital Invoicing**

STEP 2: Choose Integration Mode

1. Click **Choose Integration Mode**
2. Select **API Integration**
3. Click **Next**

This mode is required for system-to-system invoice submission.

STEP 3: Select Licensed Integrator

1. On the Licensed Integrator screen, select **Proceed with PRAL as Licensed Integrator**
2. Click **Next**

PRAL provides free sandbox testing, API access, and token issuance.

STEP 4: Fill Technical / System Details

1. **System / Software Name:** DPL Digital Invoicing System
2. **System Type:** Cloud Based
3. **ERP / Accounting System:** QuickBooks / Custom Application
4. **ERP / System Version:** QuickBooks Online or Custom App v1.0
5. **Hosting Type:** Cloud (AWS – Planned) or simply Cloud
6. **Technical Contact Name:** *Add the technical contact name here*
7. **Technical Contact Email:** technical contact email
8. **CRM / Support Email:** support email

Note: These details are internal and mainly for PRAL coordination. They do not affect invoice data.

STEP 5: Business / Invoice Configuration

1. **Business Nature / Sector:** IT Services / Software Services
2. **Invoice Type:** Sales Tax Invoice (Debit / Credit notes can be added later)

STEP 6: IP Whitelisting

1. Enter **one public IP address** that will be used to call the FBR APIs in sandbox
2. This can be:
 - a. Office internet IP, OR
 - b. Test machine / VM IP
3. IP can be updated later for production
4. Click **Add / Save**

Note: Sandbox environment accepts this IP for API calls; no invoices are submitted legally yet.

STEP 7: Submit Application

1. Review all entered details
2. Click **Submit**

3. PRAL reviews the request
4. Sandbox access will be enabled
5. **Sandbox API token** becomes visible under: Digital Invoicing → API Integration → View Web API Details
